

Course information

E-learning Basic Audiology

Learn the theoretical basics of audiology for early recognition of hearing loss in children, so they can receive the right support and are able to reach their full potential. Fully online course, consisting of smartphone-friendly e-learning lessons that are accessible offline.

Did you know that the signs of hearing loss vary from one child to another? That means it is not always easy to recognize. Moreover, children might encounter hearing loss following an illness, even if they had no hearing problems before. That is why it is crucial to be able to recognize the signs of hearing loss. The sooner it is detected, the earlier the learning environment can be adjusted to a child's needs and they receive real access to learning.

Introductory e-learning course

Kentalis International Foundation offers an e-learning course called Basic Audiology. The course consists of self-study lessons that can be done offline on smartphones, at your own pace. It gives you a comprehensive understanding of audiology basics, and will provide you with valuable knowledge about the anatomy and physiology of the hearing system, the levels of hearing loss, how to identify signs of hearing loss, and which screening instruments are suitable to conduct a hearing examination. The course also offers insights into how hearing loss affects a child's speech, communication, and daily activities.

Course outcomes:

- > Understand the different causes and levels of hearing loss.
- > Know the theory about recognizing the signs of hearing impairment.
- > Learn about the anatomy and physiology of the hearing system.
- > Grasp the implications of hearing loss on speech, communication, and daily life.

Suitable for

This e-learning course is designed for teachers, medical staff, community workers, governmental and non-governmental institutions in the Global South, and anyone who has an interest in the basics of audiology. Because the course is fully online, it can be completed by each participant at their own time and pace.
